Celebrations at the University of Stuttgart – two clusters for which the university applied for a grant as part of the Excellence Strategy run by the federal and state governments have been awarded funding for seven years as of 1 January 2019.

The “Data-integrated simulation sciences” Cluster of Excellence targets a new class of modeling and calculation methods. The “Integrated computer-based planning and construction for architecture” Cluster of Excellence concentrates on using the full potential of digital technologies to rethink approaches regarding planning and construction. The ICD Aggregate Pavilion 2018 is all about the first completely enclosed architectural space made from a specially designed granular material, whereby the particles only interact with each other through contact forces.

As 2018 is coming to a close, we gratefully and confidently look back to a year of productive teamwork and our University’s many achievements in scholarship and research.

May the Christmas and the New Year’s Holidays serve as inspiration to take on new challenges in your many fields of study and research.

Season’s Greetings, Merry Christmas and a Happy New Year from University of Stuttgart.
